Team	• Oracle PM: Angie Mills • Oracle GVP: Carly Dates • Oracle RM: Dovydas Rackauskas • Oracle CPR: Ayana Francisco	• Syntax AE: Mike Adams • Syntax PM: Violeta Albrecht • Syntax Solution Architect: Allen Jacot • Syntax VP: Rich Bradley
Key partner takeaways	• NACG is running their JD Edwards environment with Syntax providing complete portfolio of MSP Services. • Given NACG's acquisition and divestiture strategy, Syntax takes the approach with the customer to ensure they will have a streamlined entrance and exit for the ERP systems. Knowing this divestiture would most likely happen, early on Syntax had set up 2 separate JD Edwards environments for NACG. • Upon divestiture of the Kemmerer Operations organization, Syntax provided a creative solution to take out all migration costs, as well as providing a complete portfolio for Kemmerer providing cloud, database, and application management services, as all of those resources would be staying with NACG. This resulted in delivering Kemmerer with a SaaS like experience for their new environment. • Additionally Syntax' unique expertise with JD Edwards Payroll further provided a seamless transition for all organizations. • Including in the solution were non-JDE Applications – Scanman for AP Automation, Repots Now for reporting from JDE.
